

Food Microbiology Division

Application of Bacteriocins and Antimicrobial Compounds in Food Industry

Thursday, June 4

▶201

Chair: **Jong-Hyun Park** (Gachon University, Korea)

D6-1 10:00-10:35

Application of Bacteriophages and Their Endolysins for Biocontrol of Clostridial Pathogens

Arjan Narbad (Institute of Food Research, UK)

D6-2 10:35-11:10

Antimicrobial Compounds Produced by Bacterial Isolates from Korea Domestic Honey

Hyungjae Lee (Dankook University, Korea)

Chair: **Hyungjae Lee** (Dankook University, Korea)

D6-3 11:20-11:55

Bacteriocins from Lactic Acid Bacteria: Characterization and Potential Applications

Takeshi Zendo (Kyushu University, Japan)

D6-4 11:55-12:30

Potential of Antimicrobial Compounds from GRAS Microorganisms in Food Biopreservation

Hae Choon Chang (Chosun University, Korea)
